Floor telecommunications cabinets

19" floor cabinets, universal

Height (U)

18, 22, 27, 33, 38, 42, 47

Width (mm)

600,800

Depth (mm)

600, 800, 1000

Usable depth (mm)

480, 680, 880

Universal telecommunications cabinets for installation of a variety of active and passive equipment.

A wide range of modifications allows

A wide range of modifications allows you to create comprehensive solutions of any complexity.

Server cabinets

Height (U)

33, 42, 45

Width (mm)

600,800

Depth (mm)

1000, 1200

Usable depth (mm)

850, 1050

Multi-purpose telecommunications cabinets for installation of a variety of active and passive equipment. A wide range of modifications allows you to create comprehensive solutions of any complexity.

Server cabinets, Prof

Height (U)

42, 45*, 48

Width (mm

600, 800*

Depth (mm)

930, 1130

Usable depth (mm)

690, 890

Cabinets to place the equipment in server rooms and data centers. Provided pre-assembled, have a special design, optimal configuration and increased static load capacity.

Cross cabinets

Height (U)

33, 42

Width (mm)

800

Depth (mm)

800

Usable depth (mm)

580

Cross cabinets are characterized by easy switching of a large number of cables. Easy to assemble, install and place active and passive equipment

19" metal wall-mounted cabinets

Height (U)

6. 9. 12. 15

Width (mm)

600

Depth (mm)

300, 480,650

Usable depth (mm)

250, 425, 605

Standard wall telecommunications cabinets. Do not require assembly, have a metal welded structure. Very convenient if you want to organize a network in a short time that does not require frequent maintenance and installation of additional equipment.

Wall-mounted cabinets,

Height (U)

6, 9, 12, 15, 18

Width (mm)

600

Depth (mm)

350, 520, 650

Usable depth (mm)

281, 456, 581

Wall-mounted cabinets have simplified demountable structure that includes only 5 elements: roof, side walls, floor, and door.

Supplied in a compact flat package, need minimal space during storage and transportation. Easy to assemble. Ideal for organization of networks in buildings where there may be difficulties in the delivery and storage of nonseparable cabinets.

Wall-mounted cabinets, removable walls

Height (U)

9, 12, 15

Width (mm)

600

Depth (mm)

520,650

Usable depth (mm)

456, 581

These telecommunications cabinets have a frame demountable structure. Access for the installation and switching is provided from four sides. Removable side walls allow you to quickly maintain the equipment. ShRN-M cabinets are suitable for organization of networks, requiring frequent maintenance, rearrangement and adding active and passive equipment.

Sectional (kick panel) wall-mounted cabinets

Height (U)

6, 9, 12, 15

Width 600

Depth (mm)

520

Usable depth (mm)

456

These wall-mounted cabinets combine the convenience and efficiency of the installation, as they have a two-section nonseparable structure and provide easy access to installed equipment. Cabinets consist of hinged and assembly sections. Sections are fixed by a point lock. The design allows an easy access to the rear of the equipment.

Multi-purpose telecommunications racks

19" racks, single frame

Height (U)

24, 33, 38, 42, 47, 49

Width (mm)

620

Depth (mm)

600

Multi-purpose one-frame racks.

19" racks, double frame

All-weather outdoor cabinets with four sections: telecommunications. battery and two side electrical sections.

Cabinets are manufactured by advance order.

ShTV series general specifications

Vandal-proof design. Steel thickness - 2 mm Latch lock. Protection rating IP55, with climatic Relative humidity: 5-100%. equipment IP54. Insulator thickness - 10-20 mm. Grounding system.

Climatic operation conditions: Ambient temperature: -50 °C to +60 °C.

Humidity inside the cabinet: 10-75%. Atmospheric pressure: 62 - 101 kPa.

Depending on the requirements for the equipment operation the following shall be installed:

- Additional protection against unauthorized access and vandalism
- Temperature and humidity regulation system
- Climatic air-conditioning system
- Access and smoke content control inside the cabinet
- · Earthing and lighting systems

The design of ShTV cabinets depends on the project requirements. We can manufacture customized configuration according to the customer specifications. Cabinets are supplied assembled and packed in the corrugated cardboard package.

Wall-mounted telecommunications brackets

19" brackets, horizontal

Height (U)

3, 6, 9, 12

Width (mm)

512

Depth (mm)

300-500

Usable depth (mm)

300-450

19" standard structures for horizontal placement of equipment with 300-450 mm depth-adjustable front brackets.

Brackets have a fully demountable structure consisting of five elements. Easy to assemble. Have increased stiffness due to the fasteners. Gray RAL 7035, black RAL 9005

19" swing brackets

Height (U)

12, 15, 18, 22

Width (mm)

Depth (mm)

465

Usable depth (mm)

350

Brackets to place a large amount of equipment that requires frequent maintenance. The KNO-RP front frame opens for easy access to the rear of the equipment.

Brackets consist of a swing frame and base. The frame has a full-metal welded design and is fixed to the base by latches at the top and bottom. Black RAL 9005.

14 www.cmo.ru

19" power brackets

Height (U)

12, 15, 18, 22, 27

Width (mm)

Depth (mm)

460

Usable depth (mm)

400

Heavy-duty wall-mounted brackets to place heavy equipment.

Brackets have a fully demountable structure consisting of four elements: roof, floor and two vertical guides. Easy to assemble. Due to the fasteners brackets have a high load capacity. Black RAL 9005.

19" brackets, vertical

Height (U)

2, 3, 4

Width (mn

500

Depth (mm)

96, 140, 185

Brackets for vertical placement of equipment.

Provide compact placement of active and passive equipment of any depth.

Brackets have a full-metal design and do not require assembly. The rear wall has holes for fixing to the wall. Vertical installation allows the compact placement of equipment of any depth.
Black RAL 9005.

Cabinets for installation of optical devices and telephony

Wall-mounted optic box, 8 ports

Height (U)
290
Width (mm)
270

Multi-purpose wall box for the organization of an optical cable. Designed to be mounted on a wall. Very compact. The case is made of metal and the door is fixed by the lock.

Wall-mounted optic box, 16/24 ports

Height (U)
420
Width (mm)
420
Depth (mm)
50

Multi-purpose medium-size box for the organization of an optical cable. Designed to be mounted on a wall. The case is made of metal.

Cabinets for installation of optical devices and telephony

19" optical switching panel

31
Height (U)
290
Width (mm)
270
Depth (mm)
60

19" optical panel is designed to be mounted in the cabinets and open racks. The case is made of metal and has a removable top cover.

Telephony mounting cabinets

Multi-purpose cabinets for installation of 3, 5, 10, 20 and 30 LSA-PLUS (KRONE) punch down blocks. Designed to be mounted on a wall. Made of metal. Protection rating IP20, IP55.

The manufacturer has the right to make changes to the product without impairing its functional characteristics.

Floor electrical cabinets

Multi-purpose floor cabinets designed for installation of electrical equipment.

Environmental protection, protection rating IP55.

The line includes cabinets with one and two front doors.

Standard cabinet includes: case, door, door stop, rear wall and zinc-plated mounting plate.

Additional cabinets can be equipped with side walls and plinths of different heights.

Wall-mounted electric cabinets

Multi-purpose wall-mounted cabinets are designed for installation of electrical equipment. Cabinets have environmental protection and protection against unauthorized access to installed equipment.

Protection rating IP55, IP65. The line includes both compact models and large-sized cabinets.

Standard cabinet includes: case, door, zinc-plated mounting plate, grounding set and set of brackets for installation.

An idea and a product are just one step apart!

Thank you for your choice! We guarantee reliable operation of the purchased CMO equipment provided that proper operation conditions are met.

Due to the constant interaction with you, we improve standard products and manufacture new products in demand. We develop, plan and master the advanced fields, increase our production capacity, and improve our quality control system. This is a guarantee that the CMO products will always meet the highest international standards and current market requirements.

If during the process of the equipment assembling or operating you come up with any idea on how to do this or that CMO product better, we look forward to seeing your idea (project or development) on a special page of the website www.cmo.ru/idea, or e-mail idea@cmo.ru. Our designers will necessarily turn your idea into reality.

Participate in the polls, leave feedbacks and comments, use technical support and get the latest news from CMO on the website

We take care of our Clients, appreciate our Partners, and respect our Competitors.

We wish all of you well-being, growth and prosperity!
